SUMMARY

Passionate MERN Stack & Next.js Developer skilled in building fast, scalable web apps using **React, Node.js, Express, MongoDB, Next.js**, and **Tailwind CSS**. Strong problem-solver with a solid grasp of **Data Structures and Algorithms**. Focused on clean code, performance, and delivering great user experiences. Team player with experience in REST APIs and modern JavaScript practices.

EXPERIENCE

Mern Stack Intern

IIFA TECH

April 2025 - May 2025, Lahore

- Worked on backend APIs using **Node.js** and **Express.js** to connect frontend with MongoDB.
- Built **responsive UI** components following modern design principles.
- Participated in daily stand-up meetings and learned Agile development practices.
- Implemented CRUD operations and integrated **REST APIs** in live projects.
- Assisted in **bug fixing**, testing, and optimizing application performance.
- Spearheaded a **feature enhancement** project using the MERN stack, achieving a 30% improvement in application response time by refining API endpoints and enhancing database query efficiency.

PROJECT

FinWallet

[wallet-x-three.vercel.app](#) • April 2025 - May 2025

- Developed a secure web-based digital wallet system supporting **USD, EUR, and PKR** currencies.
- Implemented **role-based authentication**, enabling separate user and admin access control.
- Built wallet creation, fund deposit/withdrawal, and **peer-to-peer transfer** functionality.
- Designed and integrated **currency exchange** feature with admin-managed rates.
- Implemented **two-step user verification (passport + gun)**, with admin approval flow.
- Enabled users to **send, receive, and request funds** between wallets in different currencies.
- Created a custom **admin dashboard** to manage users, monitor transactions, and verify identities.

LawBotics

[law-botics.vercel.app](#) • November 2024 - December 2024

- Engineered LawBotics, an **AI-driven legal assistant** tool that automated document review processes, reducing manual review time by 40% and increasing accuracy by utilizing **machine learning** algorithms for contract analysis.
- Developed a **legal automation platform** to simplify document drafting and legal consultations using AI.
- Implemented **role-based login** for clients, lawyers, and admins with secure authentication.
- Enabled users to **chat with AI legal assistant** for quick guidance on basic legal matters.
- Built **admin dashboard** to manage users, monitor AI queries, and maintain platform integrity.
- Developed a feature for **AI-powered legal research**, allowing users to get quick insights on laws, case references, and legal procedures.

EDUCATION

BACHELORS'S IN INFORMATION TECHNOLOGY

University of Punjab • Lahore • 2025 • 3.1

SKILLS

HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, Redux Toolkit, Axios, AI Integration, Basic CI/CD knowledge, Authentication, Problem Solving, DSA, OOP
